

SHIELDCOAT TECHNICAL DATA SHEET

SLAB REPAIR CONCRETE CRACK SOLUTION

DESCRIPTION

Rigid fillers are bound to fail, re-cracking as concrete naturally shifts. Shieldcoat's Slab Repair is an acrylic crack repair compound engineered to stay flexible, accommodating minor substrate movement and delivering repairs that last as long as the coating applied over them.

Available in 1 size: Quart

Recommended Use: Filling cracks in concrete driveways, floors and other masonry surfaces prior to applying Step Safe Heavy Duty & Step Safe Roll On.

THE BENEFITS OF SLAB REPAIR

- **Flexible Performance:** Engineered to accommodate minor substrate movement, helping prevent re-cracking and delivering a long-lasting repair.
- **Durable Acrylic Formula:** Creates a strong, dependable repair for cracks in concrete driveways, floors, and other masonry surfaces.
- **Easy Application:** Supplied in a natural concrete color with a smooth, trowelable consistency that feathers seamlessly into the surrounding surface.
- **Ideal Surface Preparation:** The perfect crack-filling solution before applying Shieldcoat's Step Safe Heavy Duty, Floorshield, or Concreshield systems.
